ANATOLIAN COURSE OF NEUROINTERVENTIONAL RADIOLOGY
11 – 13 MAY 2006
SWISS HOTEL THE BOSPHORUS
ISTANBUL / TURKEY

“A scientific course with a difference”

Three full days of live case demonstrations with a different philosophy entirely dedicated to all the technical tricks / details of neuroendovascular procedures, beginning each case with selection of access devices, detailing all inoperative technical / device strategies as they occur and ending with peer review / discussion about

- Advanced reconstructive endovascular cerebral aneurysm treatment techniques with
 - Liquid embolic Onyx
 - Covered stents
 - Stent assisted coiling
 - Distal balloon remodelling for the treatment of anterior and middle cerebral artery aneurysms
- Advanced curative cerebral AVM treatment with prolonged intracranial Onyx injections
- Carotid stenting with distal protection
- Intracranial PTA / Stenting for cerebral atherosclerosis

Transmitted from two biplane angio suites with no interruption...

Information about the latest advances
Informal / Open discussion during the whole meeting
